

TOWN OF MIAMI LAKES LOCALIZED PAVING & DRAINAGE IMPROVEMENTS FOR EAGLES NEST

The Public Works Department held a neighborhood capital improvement project information meeting regarding the upcoming roadway and drainage project in the Eagles Nest neighborhood. The meeting was held on July 24, 2008 at the Community Center West. The meeting served as an opportunity for the residents to learn about the scope of work, the impact in their neighborhood, and provided the opportunity to make specific requests and ask questions.

VICINITY MAP

This is the first of the localized drainage improvements identified in the Town of Miami Lakes Stormwater Master Plan. This drainage improvement will address drainage deficiencies in Gage Place, Cowpen Road, and Eagle Nest Lane. It is anticipated that the project will commence in September, 2008.

Residents will be notified by the Town before construction starts, and will be provided with specific information regarding temporary lane closures.

As a part of this project, 11 new structures will be installed, as well as, 100 feet of solid pipe, and 350 feet of ex-filtration pipe. The roads will be repaved and stripped upon completion of the project.

We understand that neighborhood construction is challenging and disruptive to the residents. The Public Works Department is committed to working closely with the contractor and the residents to minimize the disruptions. Prior to the commencement of the project, we will video and photograph all swale areas and driveways to document the existing conditions, and any swale area or driveway approach that is impacted by the construction project will be restored to an equal or better condition.

For any questions or concerns, please contact the Public Works Department at 305-364-6100:

Public Works Director – Osdel Larrea

Town Engineer – Gary Ratay

Quality Assurance Inspector – Armando Munoz

Field Inspector – Tina Rivera
